

FAMA

PRODUCT LINE

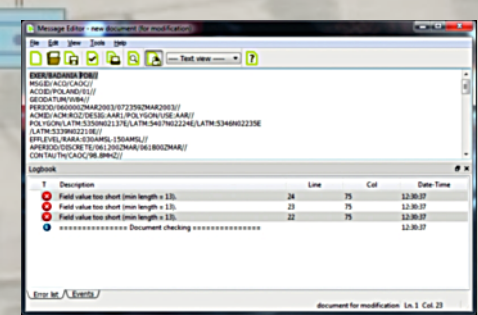

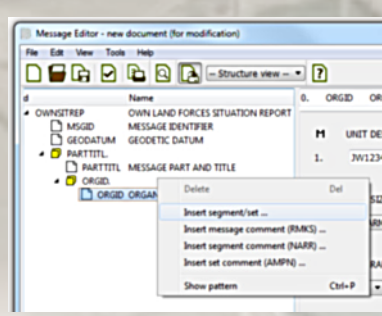

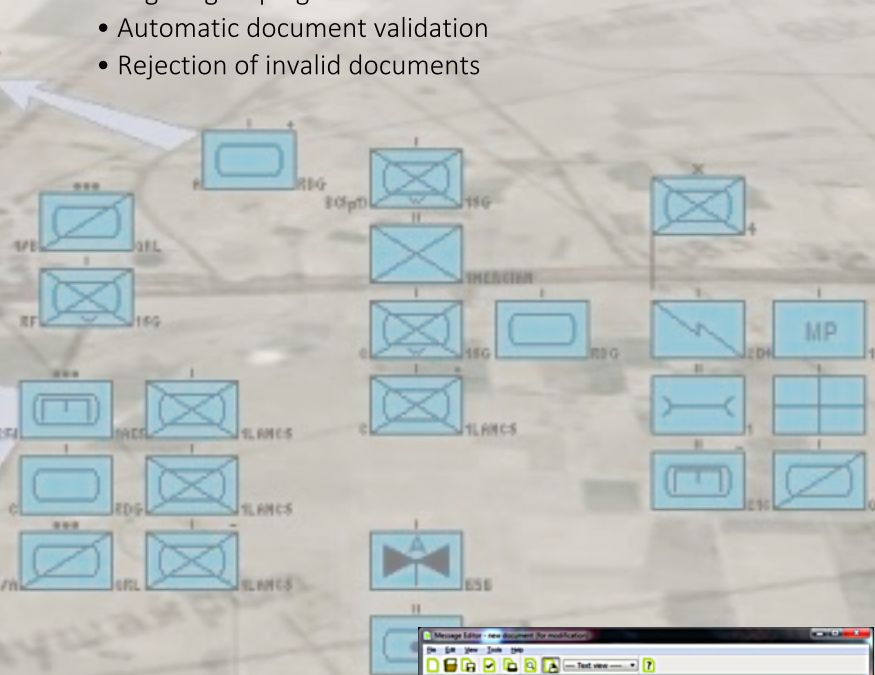

FAMA PE overview

FAMA PE enables creation, editing and preview of ADatP-3 electronic reports and orders on a standalone low-end terminal or workstation. FAMA PE facilitates focusing on the contents of an electronic document rather than on the details and complexity of ADatP-3 data transmission format.

Features

- Structure view for facilitating document processing
- Source view for correcting invalid messages
- Form view for repetitive orders and reports
- Database of ADatP-3 document type patterns
- Dictionaries of field values
- Semantic checks
- Logical grouping of information
- Automatic document validation
- Rejection of invalid documents

FAMA

PRODUCT LINE
